Introduction

LEAD Marine Contractors Limited is a marine contractor and marine equipment supplier based in Castries, St. Lucia, with a branch and operational office at Chaguaramas in Trinidad & Tobago, W.I.

Incorporated in 2020 with joining partners LEAD Marine Contractors Limited can provide a broad range of marine services to the civil and the heavy marine construction oil and gas industry.

To these industries, we deliver appropriate practical solutions in search of reliable specialized equipment and personnel, such as crane barges, deck barges, tug boats, crew boats, supply vessels, piling hammers and yard facilities.

Our area of operation is mainly in Trinidad & Tobago, the Caribbean, Leeward and Windward Islands, Guyana, Suriname and East Coast Brazil. Our strategic location in Chaguaramas, Trinidad, W.I. makes it convenient to mobilize and supply for any offshore project in the region.

Mind over Water

A large-scale industrial construction project is shown in a wide river. A massive, dark-colored rectangular structure is being hoisted by a tall crane mounted on a barge. Another barge with a crane is visible in the background, and a red offshore structure is partially submerged in the water. The sky is blue with scattered white clouds.

Markets

Heavy Lifting

In the marine offshore and civil construction sectors, as well as the lifting and positioning of structures with a wide variety of modules, we offer flexible solutions to ports, shipyards, offshore facilities and civil projects, integrated all transport and installation activities by means of floating crane and barges.

Oil & Gas

Conductor and wellhead platforms with pipe line installation

Well conductors are used as the foundation and structural support for topsides and, depending on size and water depths up to 50 meter, are fully installable by our ICE-I-100 hammer and crane barge LEAD Marlin. Minimizing the size of traditional conventional jackets reduces lead times for material and construction, allows for fabrication at our Trinidad & Tobago yard facility, which further reduces overall project costs, significant shorter times, and where required, improve project local content. To connect oil production platforms with refineries onshore we provide reel-lay pipe and cable lay services accomplished by a typical pipe laying/cable lay heavy lift crane barge with anchor spread system.

Marine Salvage

Today, protecting the coastal environment from spillage of oil or other contaminants due to a ship wreck or other maritime casualty is a high priority. Salvage may encompass diving, towing, re-floating of a vessel, or effecting repairs to a ship. For these operations we provide pre-outfitted salvage tugs and crane barges, and in addition we partner with salvage and diving companies for expertise and portable diving facilities and mobilize all resources swiftly to the salvage site.
